Contents

Feature Article

Instant Update: Considering the Molecular Mechanisms of Mutation & Natural Selection
Training and guidance for overcoming the challenges of teaching molecular evolution
Tina Hubler, Patti Adams, Jonathan Scammell .................................................. 6

Research on Learning

A Study of the Literature on Lab-Based Instruction in Biology
An analysis of ABT articles reveals a focus on novel and innovative labs, and gaps in some biology topics
Gillian Puttick, Brian Drayton, Eliza Cohen ......................................................... 12

Inquiry & Investigation

Data Nuggets: Bringing Real Data into the Classroom to Unearth Students’ Quantitative & Inquiry Skills
Using real data from current research to address NGSS standards
Elizabeth H. Schultheis, Melissa K. Kjelvik .......................................................... 19

Teaching the Big Ideas of Biology with Operon Models
Challenge your students to think, and they will understand
Robert A. Cooper  ................................................................. 30

A Model Inquiry-Based Genetics Experiment for Introductory Biology Students: Screening for Enhancers & Suppressors of Ptpmeg
Increase students understanding of the relationship between genes and gene expression
Sumana Setty, Melissa S. Kosinski-Collins .......................................................... 41

“The Strawberry Caper”: Using Scenario-Based Problem Solving to Integrate Middle School Science Topics
Presenting ecology and genetics concepts through the Strawberry Caper investigation
Rebecca L. Gonda, Kyle DeHart, Tia-Lynn Ashman, Alison Slinskey Legg .................. 50

The Difference That Data Make: Examining Bird Migration
Data to Build Scientific Skills
Use real citizen-science bird data to engage students in argumentation
Kelly Sturrer, Karen Lucci ................................................................. 56

Tips, Tricks & Techniques

Karyotype Analysis Activity: A Constructivist Learning Design
Using karyotype analysis to reinforce genetic concepts
Nooreva T. Ahmed ................................................................. 63

Position Posters: An Alternative Take on Science Posters
A research poster assignment to encourage student engagement
Meredith Dorner ................................................................. 69

“Invented Invaders”: An Engaging Activity to Teach Characteristics and Control of Invasive Species
Learning to recognize and control invasive species
Evan Lampert ................................................................. 73
