

SIX STUDIES OF FOREIGN POLICY

In six timely coordinated issues, Current History analyzes the foreign policies of the greater world powers. The Cold War still runs a high emotional temperature. These issues—exploring the historical aims of the major powers and measuring the impact of modern ideologies, of domestic political and economic conditions on the making of foreign policy—make possible a more accurate, dispassionate evaluation of the world situation in 1955.

BRITAIN'S FOREIGN POLICY (December, 1954):

Britain's "eternal interests" have been served by many able and dedicated men since the time of Elizabeth I. What is their contribution to British foreign policy? How has the British Empire adjusted to the 20th Century? What was Sir Winston's criterion for foreign-policy decisions? Seven articles study the lives and policies of outstanding British statesmen.

UNITED STATES FOREIGN POLICY, 1955 (January, 1955):

Our relations with the Soviet Union affect our over-all diplomacy. But how is our foreign policy, nominally bi-partisan, influenced by politics and politics? Do our interests completely coincide with those of Great Britain and West Europe? How can we improve our rapidly deteriorating status in Asia? Eight articles analyze our present foreign policy and our relations with the world.

RUSSIA'S FOREIGN POLICY (February, 1955):

Since the 10th Century, Russia has intermittently pursued a policy of expansion. What is the history of her relations with her neighbors to the east and to the west? Does the cause of world communism now dictate her policy or does it serve her purposes, as Pan-Slavism did in the 19th Century? Nine articles explore Russia's foreign policy under the Czars and its function today in the Soviet Union.

FOREIGN POLICIES IN LATIN AMERICA (March, 1955):

The countries south of our border, prone to revolution and political extremism, are becoming increasingly important to us and to the world. Historically, the United States and Europe have dominated Latin America. What is the present heritage of that imperialism? How important is Pan-Americanism? Eight articles trace the historical influence of the United States and Europe in Latin America.

GERMANY'S FOREIGN POLICY (April, 1955):

Drives for unification, for *lebensraum*, for hegemony in Europe have motivated German foreign policy in the past. Is there a perceptible continuity between the foreign policy of the Hohenzollerns, of Bismarck and of Hitler? What are the goals of the Bonn Republic today, as the West and the Soviet Union alike eye Germany with caution? Eight articles illuminate the foreign policy of Germany nascent, puissant and reissant.

FRANCE'S FOREIGN POLICY (May, 1955):

Is France's fear of Germany, which noticeably affects her attitude toward the Soviet Union and toward N.A.T.O., exaggerated? How do her unstable, multi-party system and her economic difficulties influence her foreign relations? What palliatives can she muster to meet current crises in her North African and Asian empire? Eight articles treat French foreign policy in the light of her problems at home and abroad.

Series in History

Here is a vivid re-creation of the American story. In fusing social—including economic and intellectual—history with the more traditional emphasis on the political story the authors succeed in weaving all the strands of American history into a more meaningful and understandable pattern.

It is a full and fascinating description of American life, its culture, its relationship with the rest of the world, and the personalities who have played a significant role in the growth of the United States since its discovery.

LIBRARY

Volume I: *Youth* covers the period from early exploration to 1877. It carries the American story through the political reconstruction following the Civil War. The Colonial period, in a relatively brief treatment, presents background material for later developments. The entire volume achieves a balanced narrative, showing the development of a distinctive American culture, with its various complex interrelationships.

Volume II: *Maturity* continues the national story of the United States from 1877 to the present, but with some earlier connections, since social, economic, and intellectual patterns are even more difficult to divide into neat chronological packages than are the political and diplomatic. The basic trends are the development of an industrialized, urban, high-speed civilization and of increasing participation and leadership in world affairs. There are, however, many cross-currents clearly visible.
