

## OUR NATIONAL CONSTITUTION

### ORIGINS, DEVELOPMENT, AND MEANING

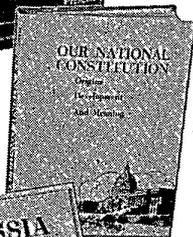

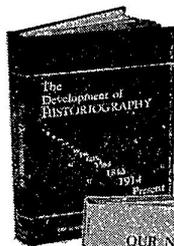

By J. A. Rickard and James H. McCrocklin,  
Texas College of Arts and Industries

Now that the study of the Constitution of the United States has become a requirement in senior high schools and teachers colleges throughout the country, the need has arisen for an adequate, modern text.

Professors Rickard and McCrocklin have met that need. In easily comprehended yet scholarly style, they have presented the historical background, development, and interpretation of the American Constitution and its twenty-two amendments.

In addition to its value as a textbook in courses in American history and political science, **OUR NATIONAL CONSTITUTION: ORIGINS, DEVELOPMENT, AND MEANING** is deserving of a place in the library of every well-informed American.

## RUSSIA: A CONCISE HISTORY

By Dorsey D. Jones,  
University of Arkansas

Professor Jones's treatment of Russian history is at once both concise and thorough. He has given the essential facts and an interpretation of the larger features of Muscovite development from earliest beginnings up through the early part of 1955.

"Not all of the changes in the U.S.S.R. have been crystallized," he writes in his preface, "but whether one is hostile or sympathetic to these changes, he should not be ignorant of Russian history or of the Soviet drama to which it is the key."

## DEVELOPMENT OF HISTORIOGRAPHY

Edited by Matthew A. Fitzsimons, University of Notre Dame

Alfred G. Pundt, Pennsylvania State University

and Charles E. Nowell, University of Illinois

Twenty-five scholars, both American and foreign, have combined their efforts to produce this history of historical writing. The result is a volume that is both up-to-date and comprehensive.

THE CATHOLIC WORLD says regarding this book that its authors "have given us much more than the history of history-writing. This volume might well serve to outline the development of thought and culture."

*Pioneering in approach      Unique in treatment*

This book is an eminently readable and pedagogically sound auxiliary text for the introductory course in European or world history. The primary purpose of the volume is to teach the historical approach or historical-mindedness by describing such general concepts as the relationship of the past to the present, the nature of social forces, causation, change, and continuity.

History is regarded as a dynamic continuum, and the process of learning historical-mindedness has been systematized and clarified by presenting each of the essential ingredients in turn. By use of simple analogies, by references to their environment, and by illustrations primarily from modern history, the book familiarizes the student with the various elements of the historical approach. The text also has a political orientation, a concomitant purpose being to replace rudimentary and over-simplified political notions with more advanced ones.

The chapters parallel the successive periods studied in Modern European History, and the text is designed primarily as a "second Book" in introductory courses in European or world history.
