

INFORMATION FOR AUTHORS

MUSIC PERCEPTION publishes original theoretical and empirical papers, methodological articles, and critical reviews concerning the study of music perception and related topics. Articles are welcomed from a broad range of disciplines, including psychology, psychophysics, neuroscience, music theory, acoustics, artificial intelligence, linguistics, philosophy, anthropology, cognitive science, computer science, speech science, and data science. The journal publishes in the English language.

Authors are requested to submit their manuscript using Manuscript Central: <https://mc.manuscriptcentral.com/ucpress-mp#>.

Questions may be directed to the Editor by email: EditorMP@westernsydney.edu.au.

Manuscripts are accepted for review on the understanding that they have not been published and are not presently submitted for publication elsewhere. Where relevant, authors should indicate in a cover letter that ethical clearance was obtained for experimental data collection and ethical guidelines followed. The review process is not blind, that is, reviewers are typically aware of the identities of the authors. Authors who wish to have their identities withheld from reviewers should make a specific request in the cover letter accompanying the submission.

There are no explicit length restrictions for acceptability of standard articles. Research Reports not exceeding 3000 words, and Notes and Comments, critical comment on articles published here and elsewhere and not exceeding 1000 words, are welcome.

Books for consideration for review should be sent to the Editor.

FORM AND STYLE Accepted manuscripts must be submitted in Microsoft Word format. The journal adheres to the sixth edition of the Publication Manual of the American Psychological Association regarding form and style. **The manual should be consulted for specific items not covered in the general list below.**

ORGANIZATION Manuscripts should be double-spaced throughout, including references, footnotes, tables, and figure captions. Leave margins of 1–1.5 inches (2.5–4 cm) on all sides. Pages should be numbered consecutively throughout. Page 1 should consist of the running head (up to 50 characters), the title of the article (recommended: no more than 12 words), and the authors' names and affiliations (see APA 6th, Chapter

2). Page 2 should contain a short abstract of 100–200 words. At the end of the abstract please list five keywords or phrases. The text should follow, starting on a separate page. References, appendixes, author note (including name and complete mailing/e-mail address for correspondence), and footnotes should follow in that order, each starting on a new page. These should be followed by tables, each on a separate page, then by figure captions, starting on a new page, and then figures, each on a separate page.

HEADINGS Appropriate headings and subheadings should indicate the organization of the paper (see APA 6th, Chapter 3).

PARTICIPANTS Use of the term “participant” is preferred, but “subject” is permitted.

EQUATIONS Displayed equations should be numbered consecutively. The number should be placed in parentheses to the extreme right of the equation.

RESULTS Refer to APA 6th (Chapter 4) for guidance on presentation of statistics in text, including statistical abbreviations and symbols. Use a zero before a decimal point when numbers are less than one, unless the number cannot be greater than one (e.g., correlations, levels of statistical significance). Report to two decimal places (some exceptions: more decimal places may be reported for Bonferroni tests and exact randomization probabilities). Include degrees of freedom when reporting, for example, F , r , R , and χ^2 statistics. When reporting results of ANOVA, the inclusion of MSE or effect size is recommended. Linear Mixed Models and Bayesian statistical methods are encouraged.

REFERENCES Within the text, references should be cited by surname of the author, followed by the year of publication in parentheses; for example, “Jones (1970) has shown that. . .” When there are two authors, cite both names, as (Smith & Jones, 1973). When there are more than two authors, cite all authors the first time the reference occurs. When there are six or more authors, use et al. for each occurrence. In subsequent citations, give the surname of the first author followed by et al. and the year of publication, as (Smith, Jones, & Cooper, 1975) and (Smith et al., 1975). References should be typed starting on a separate page (double spaced, no extra carriage returns between citations, and in hanging indent format where, for each citation, the first line is flush left and subsequent lines are indented),

and arranged alphabetically by the names of the authors. It is the responsibility of the author(s) to ensure the accuracy of all entries in the reference list. Journal names should be written out in full. Page numbers for all chapters in books and proceedings must be included, and issue numbers only included if the journal paginates each issue from the number "1." The following examples show the style of referencing required (see APA 6th Chapters 6 and 7 for further guidelines):

MARGULIS, E. H. (2014). *On repeat: How music plays the mind*. Oxford, UK: Oxford University Press.

MERKER, B., MORLEY, I., & ZUIDEMA, W. (2018). Five fundamental constraints on theories of the origins of music. In H. Honing (Ed.), *The origins of musicality* (pp. 49-80). Cambridge, MA: MIT Press.

PRZYSINDA, E., ZENG, T., MAVES, K., ARKIN, C., & LOUI, P. (2017). Jazz musicians reveal role of expectancy in human creativity. *Brain and Cognition*, 119, 45-53.

FOOTNOTES Authors are asked to use footnotes judiciously and, in most cases, to integrate important information in the text (see APA 6th, Chapter 2).

TABLES Tables must be formatted using the table function in Word, not using tabs or spaces (see formatted examples, starting APA 6th, Chapter 5). These should be numbered consecutively with Arabic numerals in order of appearance within the text. Each table should be typed on a separate page. A short descriptive title should be typed below the table number. Indicate in the text the approximate place where the table is to be inserted.

FIGURES AND FIGURE CAPTIONS Refer to APA 6th, Chapter 5, for figure preparation guidelines. Use a sans serif font (e.g., Helvetica, minimum 8 pt, maximum 14 pt). Symbols should be no larger than 4 pt. Axes labels should be centered, in capital then lowercase letters with units of measurement in parentheses. Indicate in the text the appropriate place where the figure is to be inserted. The figures should be numbered with Arabic numerals in order of appearance in the text. Figure captions should be typed consecutively on a separate page preceding the figures. For the review process,

include the figures in the single PDF file. For accepted manuscripts, figures must be sent as individual high resolution (300 dpi or greater) TIFF or EPS files. UC Press is able to print a limited number of pages in color; please only submit color figures for art (e.g., brain scans) or data (complex data presentation) that cannot be translated clearly in black and white or grayscale.

Including Supplementary Materials

Music Perception allows the provision of supplementary materials in the online version of the journal. Supplementary files should be submitted at the time of the regular submission of a manuscript.

Authors wishing to include supplementary files along with their articles should be familiar with and adhere to the following best practices.

1. Support for supplementary materials is intended for binary data files that enhance or supplement a document, but that are not discussed as part of the document or essential to the conclusions of the text.
2. The most common document types that are used as supplementary materials are: Microsoft Office documents, datasets, audio, video, and text files. When choosing file types - particularly for audio and video files - keep in mind that users will need to download and play these files so it is important to use formats that are supported in the most common players (e.g. QuickTime, Windows Media Player).
3. Also because users will have to download these files, they should be no bigger than 10 MB in sizes - and in most cases they should be between 100K and 3MB - so that users will be able to quickly download them. For larger files, it may be possible to compress them into a .zip file in order to reduce the file size.
4. Keep file names as short as possible, yet distinct from each other. (E.g. Figure1.jpg, Figure2.jpg, supplement1.pdf, supplement2.pdf, etc.)
5. *Music Perception* does not support inclusion of executable files (e.g., .bat, .app, .com, .cgi, .exe) as supplementary material. This includes the inclusion of executable files as part of a .zip or .tar file.

ANNOUNCEMENTS

To submit an announcement for inclusion in *Music Perception*, e-mail musicperceptionjournal@gmail.com and attach the announcement in Word format. Announcements will be published as production timing and space allow.

CONFERENCE ANNOUNCEMENT

THE NEUROSCIENCES AND MUSIC – VII
Connecting with Music Across the Lifespan
Aarhus, Denmark

June 19-22, 2020

In collaboration with Center for Music in the Brain (MIB) and in partnership with Aarhus Universitet, The Royal Academy of Music, City of Aarhus, and Visit Aarhus.

The Mariani Foundation for Paediatric Neurology announces The Neurosciences and Music - VII congress to be held in Aarhus, Denmark, from June 19-22, 2020. The seventh edition of this established series will again gather the main experts from all over the world for the most important conference in the field. The central theme will focus on Connecting with music across the lifespan. The program will include Keynote Lectures, Symposia, Poster Sessions, and a Pre-conference Workshop. The meeting will be of interest to neuroscientists, psychologists, clinicians and professionals in the medical field, therapists, educators, musicians, musicologists, and students in each of these fields. The conference will be co-hosted by the Danish National Research Foundation's Center for Music In the Brain (MIB), an interdisciplinary center of excellence addressing the dual questions of how music is processed in the brain and how this can inform our understanding of fundamental principles behind brain processing in general. The whole city of Aarhus, which features a beautiful and concentrated array of unique historical and cultural venues, will be transformed into the host venue for Neurosciences and Music! Alongside the scientific program, the Royal Academy of Music Aarhus/Aalborg (RAMA) opens its doors to the conference and offers dedicated musical opportunities. Music will fill the air throughout the social program. High-level musical events in a variety of genres will be offered in unique settings. Jam sessions will be arranged with local musicians, inviting conference participants to join in and share their talents. See www.fondazione-mariani.org for details.

Scientific Committee

- **Peter Vuust**, conference director, Center for Music in the Brain (MIB), Department of Clinical Medicine, Aarhus University & The Royal Academy of Music Aarhus/Aalborg (RAMA), Aarhus
- **Elvira Brattico**, program coordinator, Center for Music in the Brain (MIB), Department of Clinical Medicine, Aarhus University & The Royal Academy of Music Aarhus/Aalborg (RAMA), Aarhus
- **Eckart Altenmüller**, Institute of Music Physiology and Musician's Medicine, Hannover, Germany
- **Giuliano Avanzini**, "C. Besta" Neurological Institute, Milan, Italy
- **Shinichi Furuya**, SONY Computer Science Laboratory (CSL), Tokyo, Japan
- **Stefan Koelsch**, University of Bergen, Norway
- **Nina Kraus**, Auditory Neuroscience Laboratory, Northwestern University, Chicago, USA
- **Katie Overy**, Institute for Music in Human and Social, Development, University of Edinburgh, UK
- **Aniruddh Patel**, Department of Psychology, Tufts University, Boston, USA
- **Virginia Penhune**, Department of Psychology, Concordia University, Montreal, Canada
- **Gottfried Schlaug**, Beth Israel Deaconess Medical Center and Harvard Medical School, Boston, USA
- **Mari Tervaniemi**, Cognitive Brain Research Unit, Institute of Behavioural Sciences, Helsinki, Finland
- **Barbara Tillmann**, Lyon Neuroscience Research Center, France

Local Organizing Committee

- **Bjørn Petersen, Elvira Brattico, Tina Bach Aaen, Marcus Pearce, Peter Vuust**, Center for Music in the Brain (MIB), Department of Clinical Medicine, Aarhus University & RAMA, The Royal Academy of Music Aarhus/Aalborg
- **Henriette Blæsild Vuust**, Center of Functionally Integrative Neuroscience (CFIN), Department of Clinical Medicine, Aarhus University
- **Anne Danielsen**, RITMO, University of Oslo
- **Morten Kringelbach**, Center for Music in the Brain (MIB), Department of Clinical Medicine, Aarhus University & RAMA The Royal Academy of Music Aarhus/Aalborg

Scientific Advisors

- **Isabelle Peretz**, University of Montreal, BRAMS, Canada
- **Robert Zatorre**, McGill University, BRAMS, Montreal, Canada

Scientific Coordinator

- **Luisa Lopez**, “Villa Immacolata”, Viterbo University “Tor Vergata”, Rome
